Caveat.

In July 2019, GMP implemented one of the largest IT infrastructure changes in UK policing. The systems are in continual development and the data provided for this request is what the systems currently hold.

- This data contains non-crime incidents with a created date between 23rd October 2014 and 22nd October 2024 where the non-crime incident reason description was equal to '300/02', and the crime committed at location was within 4km of the point with eastings and northing as per below:
- Easting: 386734
- Northing: 383394

Response - The report we ran is a nil return. This will be because the use of non-crime incident code 'N300/02 – suicide' only commenced on 12th November 2024.
