

Date: 01/02/2024
Our ref: 01/FOI/24/011923/L

FREEDOM OF INFORMATION REQUEST REFERENCE NO: 01/FOI/24/011923/L

I write in connection with your request for information dated 10/01/2024, received by Greater Manchester Police (GMP) for the following information:

1 - Can I please request an ethnic breakdown (self-identified preferably) of suspect and victim for 2000-2003 by borough by detailed crime?

2 - Can I please request an ethnic breakdown of suspect and victim for 1995-1998 by borough by detailed crime?

Result of Searches

Following receipt of your request searches were conducted within Greater Manchester Police (GMP) to locate information relevant to your request. I can confirm that the information you have requested is held by GMP.

Caveats:

In July 2019, GMP implemented one of the largest IT infrastructure changes in UK policing. The systems are in continual development and the data provided for this request is what the systems currently hold.

This data contains crimes with a created date between 1st January 2000 and 31st December 2003 and 1st January 1995 and 31st December 1998, excluding cancelled crimes. Further information about cancelled crimes can be obtained from the Home Office Counting Rules. Suspects may be attached to more than one crime during this time period, which means that the data cannot be used to identify the number of unique suspects. Suspects have been included even if no action has been taken against them e.g. eliminated, insufficient evidence, wants.

We are aware of an issue that allows more than one victim to be attached to a crime, which is incorrect as stated in the Home Office Counting Rules.

It is possible for a victim or offender to be added onto a crime more than once under multiple ethnicities, therefore the same person may be counted more than once for the same crime if this is the case.

We are aware of various issues affecting committed at locations for some crimes (see below for details). These issues mean that data for a specific location may include crimes that did not happen in that location and/or exclude crimes that did.

- Some crimes do not have a beat code, which means that they cannot be mapped to other geographies e.g. districts.
- Some crimes have an incorrect beat code, which means that they are mapped to the wrong geographies.

We are aware of an issue that allows more than one committed at address to be added to a crime, which is incorrect as stated in the Home Office Counting Rules. This may mean that crimes have more than 1 district and may be counted more than once.

Management of Police Information regulations state that non-essential records should be removed from police systems six financial years after the year in which they were originally created. This means that data that is more than six financial years old may be incomplete and should not be compared to more recent data.

Question 1 Victim Data
