

Date: 9th July 2024
Our ref: FOI/24/012855/U

FREEDOM OF INFORMATION REQUEST REFERENCE NO: FOI/24/012855/U

I write in connection with your request for information dated 27/06/2024, received by Greater Manchester Police (GMP) for the following information:

This is brilliant, and I apologise for the delayed response.

Can I request race hate victim data again for 2013 to 2017?

Is it possible also if I can ask how far back you have data on race hate crime on your stored system? I know you made changes in 2019 like you said. I would like to if possible get the data on this back to around the earliest possible time point you have available. This would help me plan out the data I want to need to collect

Thanks very much in advance,

Result of Searches

Following receipt of your request searches were conducted within Greater Manchester Police (GMP) to locate the requested information and I can confirm the information requested is held by GMP. Please see the attached spreadsheet for your response data.

Caveats:

In July 2019, GMP implemented one of the largest IT infrastructure changes in UK policing. The systems are in continual development and the data provided for this request is what the systems currently hold.

- This data contains hate crimes with a created date between 1st January 1999 and 31st December 2017, where the racial qualifier flag is equal to Yes, excluding cancelled crimes.

Further information about cancelled crimes can be obtained from the Home Office Counting Rules.

- Management of Police Information regulations state that non-essential records should be removed from police systems six financial years after the year in which they were originally created. This means that data that is more than six financial years old may be incomplete and should not be compared to more recent data.
- Non-crime hate incidents are not included in the data.
- We are aware of various system issues affecting committed at locations for new and migrated crimes (see below for details). These issues mean that data for a specific location may include crimes that did not happen in that location and/or exclude crimes that did.
 - Some crimes do not have a beat code, which means that they cannot be mapped to other geographies e.g. districts.
 - Some crimes have an incorrect beat code, which means that they are mapped to the wrong geographies.
 - Some crimes do not have an address because e.g. the address has been recorded in a non-standard format or as map coordinates.
