FREEDOM OF INFORMATION REQUEST REFERENCE NO: 01/FOI/24/012591/P

I write in connection with your request for information dated 06/05/2024, received by Greater Manchester Police (GMP) for the following information:

I would like to request a FOI disclosure for the details of all fixed-speed cameras along the M60 (Manchester Outer Ring Road).

Please can you;

- 1. Identify all camera locations.***
- 2. Identify the make, model and serial of each camera.***
- 3. Identify if each camera is forward-facing or rear-facing.***
- 4. The date each camera was installed.***
- 5. Provide all future planned speed camera installations.***

Result of Searches

Following receipt of your request searches were conducted within Greater Manchester Police (GMP) to locate the requested information and I can confirm the information requested is held by GMP.

However, I am not obliged to supply the information you have requested as an exemption applies.

When refusing to provide such information because an exemption applies, Section 17(1) of the Freedom of Information Act 2000 requires GMP, to provide you - the applicant - with a notice which: (a) states that fact, (b) specifies the exemption in question and (c) states (if that would not otherwise be apparent) why the exemption applies.

For question 1 of this request the following exemptions apply.

Section 31(1)(a)(b) Law Enforcement
Section 38(1)b Health and Safety

Sections 31(1)(a)(b) and Section 38 (1)b are prejudice based and qualified exemptions; there is a requirement to articulate the harm that would be caused in disclosing such information as well as carrying out a public interest test, which can be seen below.

Public Interest Test

Section 31– Harm

To disclose the locations of all fixed speed safety cameras along the M60 will create potentially dangerous information being released into the public domain. This would create a perception that motorists may travel excess of the speed limit without fear of being caught. This may encourage individuals to travel above the speed limit in other areas. The faster the traffic travels, the higher the risk of accidents to motorists and pedestrians. This would impact on the law enforcement capabilities of GMP in the prevention and detection of crime and the apprehension or prosecution of offenders.

Factors Favouring Disclosure

The disclosure details of any operational safety cameras and their operational functions would assist the populous in taking steps to better protect themselves. It would also show GMP's accountability in the use of public funds when policing.

Factors Favouring Non-Disclosure

Conversely to the factors in favour of disclosure, to publicly release information about operational safety cameras and exact locations would impact on the law enforcement capabilities of GMP and would undermine the effectiveness of the cameras and our road safety enforcement. It would allow a perception and encouragement that motorists may travel in excess of the speed limit without generating a fine/endorsement, which would impact of GMP's ability to prevent and detect crime and apprehend or prosecute offenders. Additionally, this would undoubtedly increase the risk of the health and safety of pedestrians and other motorists.

Section 38 –Harm

To disclose the number of operational speed camera locations and their operational functions would encourage motorists to break the speed limit and drive dangerously in areas not listed. This would undoubtedly increase the risk of the health and safety of pedestrians and other motorists.

Factors Favouring Disclosure

The disclosure of operational speed camera locations and their operational functions would encourage transparency between the Force and the public.

Factors Favouring Non-Disclosure

To divulge to the wider public the number of operational speed cameras and their operational functions, may encourage individuals to travel at greater speeds. The faster the traffic travels, the higher the risk of accidents to motorists and pedestrians. In addition, knowing other operational functions of safety cameras could encourage the public to drive dangerously and pay less attention to the road.

Balancing Test

When balancing the public interest test GMP has to consider whether the information should be released into the public domain, therefore arguments need to be weighed against each other.

The most persuasive reason for disclosing the information would be the fact that disclosure would encourage transparency, which needs to be weighed against the strongest reasons for non-disclosure, which in this case is the likelihood of individuals being put at risk. The safety of the communities GMP police is of paramount importance and the Force would not detrimentally impact on that safety by disclosing harmful information in response to a FOI request.

Therefore, having considered all the factors for and against disclosure it is the decision at this time to maintain the above exemptions and withhold the information requested.

1. See exemption above.
2. No information held. Please contact National Highways for this question.
3. No information held. Please contact National Highways for this question.
4. No information held. Please contact National Highways for this question.
