Caveats

In July 2019, GMP implemented one of the largest IT infrastructure changes in UK policing. The systems are in continual development and the data provided for this request is what the systems currently hold.

- The crime count is the total volume of crimes with female victims for each of the areas for the period 01/01/2010-31/12/2016. The data has been provided as a total for the entire period and by calendar year.
- Where possible duplicates have been removed.
- The data is based on the date the crime was created and not when the crime was committed.

Due to some low results, data has been provided yearly as by providing all this information split by individual month/day as you have requested would significantly increase the likelihood of identifying the individual(s) concerned, and as such the exemption under S40(2) – Personal Information, would be engaged and result in information being refused. By replacing the data this way, it can be provided in its entirety.
