FREEDOM OF INFORMATION REQUEST REFERENCE NO: FOI/26/016074/J

I write in connection with your request for information dated 31/12/2025, received by Greater Manchester Police (GMP) for the following information:

I work in a children's residential care home and every month, we are required by Ofsted to update our location risk assessment in order to keep our children safe.

Could I please request the crime statistics for the Rusholme area from the 1st of December 2025 till the 31st of December 2025.

Result of Searches

Following receipt of your request searches were conducted within Greater Manchester Police (GMP) to locate the requested information. I can confirm the information requested is held by GMP.

Caveats:

In July 2019, GMP implemented one of the largest IT infrastructure changes in UK policing. The systems are in continual development and the data provided for this request is what the systems currently hold.

This data contains crimes with a created date between 01/12/2025 and 31/12/2025 where the community area is 'Rusholme', excluding cancelled crimes and crimes classified as fraud. Further information about cancelled crimes can be obtained from the Home Office Counting Rules. Details regarding fraud crime can be obtained by contacting the NFIB.

We are aware of various system issues affecting **committed at locations for new and migrated crimes** (see below for details). These issues mean that data for a specific location may include crimes that did not happen in that location and/or exclude crimes that did.

- Some crimes do not have a beat code, which means that they cannot be mapped to other geographies e.g. districts.
- Some crimes have an incorrect beat code, which means that they are mapped to the wrong geographies.

Due to low numbers being returned, some of the totals have been replaced with X, as by providing all this information as you have requested would significantly increase the likelihood of identifying the individual(s) concerned, and as such the exemption under S40(2) – Personal Information, would be engaged and result in information being refused. By replacing this data in this way, it can be provided in its entirety.
