

Date: 27th February 2026
Our ref: FOI/26/016404/H

FREEDOM OF INFORMATION REQUEST REFERENCE NO: FOI/26/016404/H

I write in connection with your request for information dated 16/02/2026, received by Greater Manchester Police (GMP) for the following information:

***Dear Freedom of Information Officer,
Re: Freedom of Information Act 2000 Request Under the Freedom of Information Act 2000,
please search your Command and Control (CAD) system for all incident logs recorded between
1 January 2020 and today, 16 February 2026 where the 'Final Call Type', 'Incident Description',
or 'Closing Narrative' contains any of the following keywords:***

***'UFO'
'unidentified flying object'
'unexplained light'
'anomalous craft'
'lights in the sky'
'unidentified aerial phenomena'
'alien'
'extra-terrestrial'***

***Please provide the summary narrative of each matching log, including the date, time, and
general location (e.g., town or district).***

***To ensure the request is focused on substantive reports and remains within the cost limit,
please exclude incidents with the following closing codes:***

L10 Duplicate

L19 Error

L22 Test or Training

***I am content for all personal data, including the names and contact details of the reporting
individuals, to be redacted to ensure compliance with the Data Protection Act 2018.***

***If you estimate that the cost of complying with this request will exceed the statutory limit, please provide advice and assistance under Section 16 of the Act on how I might refine the keywords or timeframe to receive a partial disclosure.
I look forward to receiving a response within 20 working days***

Result of Searches

Following receipt of your request searches were conducted within Greater Manchester Police (GMP) to locate the requested information. I can confirm the information requested is held by GMP. However, I am not obliged to supply you with all the information as an exemption applies to part of your request.

The Freedom of Information Act is a piece of legislation designed to give the public access to information held by public authorities. It exists to make the decisions of those authorities transparent and to keep the populace better informed regarding matters which affect them.

A Public Authority is able to refuse requests which can divert resources away from more deserving requests and other public business, or threaten to undermine the credibility of the freedom of information system. It is recognised that dealing with unreasonable requests can place a strain on resources and get in the way of delivering mainstream services. This is particularly relevant at this time due to the ongoing demand on GMP's FOI unit which is currently experiencing high workloads and reduced levels of staffing.

When identifying potentially vexatious requests the indicators contained within the Information Commissioner's guidance on Section 14(1) should be considered. In this case we feel the following indicator applies specifically to "***summary narrative of each matching log***" of your request:

Burden on the Authority

Pursuant to the provisions of Section 14(1) of FOIA a request deemed as overly burdensome does not oblige GMP to comply with a request for information.

The ICO confirms within their guidance that they consider there to be a high threshold for refusing a request on such grounds if there is a viable case in line with the below recommendations:

- 1) The requester has asked for a substantial volume of information and
- 2) The authority has real concerns about potentially exempt information, which it will be able to substantiate if asked to do so by the ICO and
- 3) Any potentially exempt information cannot easily be isolated because it is scattered throughout the requested material.

As such the summary of each incident is being refused due to the amount of time required to review and prepare the information for disclosure, which would impose a grossly oppressive burden on the organisation.

To provide the summary of each incident would involve manual redactions to each incident description as they do contain sensitive and personal information which could identify directly or indirectly a living human therefore Section 40(2) Personal Information will be engaged as this represents information that identifies a living individual, to disclose this information would breach the principles of the GDPR and the Data Protection Act 2018. Personal data is defined by Article 4 of the GDPR and Part 1 of the Data Protection Act 2018, and means any information relating to an identified or identifiable natural person ('data subject'). An identified natural person is one who can be identified directly or indirectly from that data.

The number of incident descriptions which would need to be reviewed and redacted is 666 therefore at a very conservative estimate of 5 minutes to review and redact each piece of data, it would take approximately 55.5 hours to complete.

For this reason, any further requests of this nature will be refused under Section 14(1) of the Act, which states that requests that are considered to be vexatious do not have to be complied with.

However, please see below for the response to the remaining of your request.

Please see the attached spreadsheet, noting the below caveats.

Caveats:

In July 2019, GMP implemented one of the largest IT infrastructure changes in UK policing. The systems are in continual development and the data provided for this request is what the systems currently hold.

- This data contains incidents with a created date between 1st January 2020 and 16th February 2026 where the title, details or contact comments contains 'UFO'; 'unidentified flying object'; 'unexplained light'; 'anomalous craft'; 'lights in the sky'; 'unidentified arial phenomena'; 'alien', or 'extra-terrestrial', excluding incidents with a closing code of L10 Duplicate, L19 Error or L22 Test or training. Please note:
 - The keyword methodology does not account for spelling errors.
 - The appearance of the keywords in the text fields does not necessarily mean that records are relevant to the context the applicant is expecting. For example, the keyword search can returned incidents which involve a vehicle registration or a make of an object.
