FREEDOM OF INFORMATION REQUEST REFERENCE NO: 01/FOI/26/017814/Z

I write in connection with your request for information dated 08/10/2026, received by Greater Manchester Police (GMP) for the following information:

I'm writing to ask for some information about the recently installed cameras along Stockport Road Bredbury and beyond to Woodley.
There appear to be approximately 11+ cameras along this stretch of road, and there has been considerable discussion locally about their purpose and capabilities.
While they appear to be average-speed cameras, there have also been suggestions that they can detect red-light offences, mobile phone use and seat belt offences.
Would you be able to clarify exactly what type of cameras have been installed, their make and model, and which offences they are currently being used to enforce?
I'd also be interested to know why this particular stretch of road was selected, and whether all the cameras are currently operational.
If this information is not readily available, please treat this email as a request for recorded information under the Freedom of Information Act 2000.

Result of Searches

Following receipt of your request searches were conducted within Greater Manchester Police (GMP) to locate information relevant to your request. I can confirm that the information you have requested is held by GMP.

The cameras on the B6104 are Jenoptik average speed cameras. Further information is available on the Jenoptik website: New average speed cameras in Greater Manchester | Jenoptik.

Details on their capabilities can be found on the Transport for Greater Manchester (TFGM) website Safety cameras | Bee Network | Powered by TfGM.

Consultation between local authorities, in this case Stockport Metropolitan Borough Council, with TFGM determined the location of the cameras through the Safer Roads Greater Manchester partnership. Therefore, any questions in relation to this should be directed to them.
