

INFORMATION SHEET FOR PERSONS SPRAYED WITH TW1000 IRRITANT SPRAY

You have been sprayed with:

TW1000 Police Irritant Spray

The spray consist of:

<i>Active Chemical Suspended in</i>	NONIVAMIDE (0.30%)	CAS No. 2444-46-4
	29% Mono Propylene Glycol	CAS No. 57-55-6
	20% Isopropyl Alcohol	CAS No. 67-63-0
	50% Water	

This may have the following effects:

TW1000

This will cause discomfort to the eyes and a burning sensation to the skin. If you have swallowed any you should not experience any internal discomfort at all although your mouth will feel as though you have eaten very spicy food such as curry.

Most symptoms will subside of their own accord within 35 minutes of being exposed. It may cause your skin to go red and feel hot and remain so for up to 1 hour, when normal colour will start to return. This is normal as Nonivamide stimulates blood circulation giving similar effects to the use of muscle pain relief cream.

If the symptoms continue, then washing / bathing the face and eyes in **cool, clean running water** should bring rapid relief. If TW1000 has got into the eyebrows, hair or beard it is possible that it could re-activate the first time that it comes into contact with water. For example; taking a shower the next day. The effect will not be as strong and can be avoided by keeping the eyes tightly closed and washing and rinsing the area thoroughly.

If symptoms persist you should consult your doctor. **Take this sheet with you.**

TW1000 may cause damage to certain types of contact lens. If you have problems with your lenses, you should consult an optician. **Take this sheet with you.**
